2.2. Ideation & Brainstorming Map

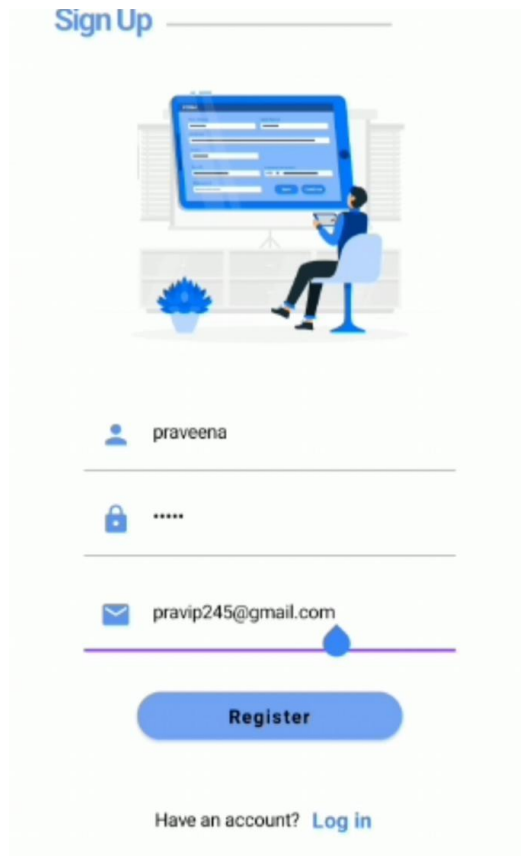

3. RESULT

3.1. Data Model

Object name	Fields in the Object	
Sign up	Field label	Data type
	Username	String
	Password	String
	Email	String
Log in	Field label	Data type
	Username	String
	Password	String

AN ANDROID APPLICATION FOR KEEPING UP WITH THE LATEST HEADLINES

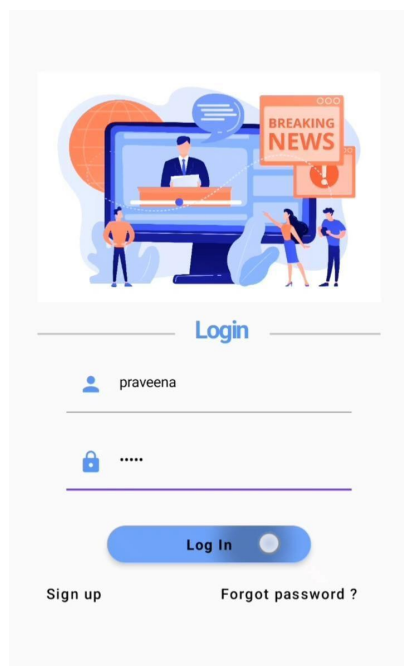

3.2. The screenshots of your project activity along with the description.

The Sign Up screen features a header with the text "Sign Up" in blue. Below the header is an illustration of a person sitting at a desk with a large monitor displaying a login form. The form has fields for username, password, and email, with a "Log In" button. Below the illustration, there are three input fields: the first contains the username "praveena", the second contains a masked password "*****", and the third contains the email "pravip245@gmail.com". A blue "Register" button is positioned below the email field. At the bottom, there is a link "Have an account? Log in" in blue.

Sign Up :

It is a page where user have to register for creating new account for them , then only they can log in with that details

5. ADVANTAGES & DISADVANTAGE

Advantages :

- It makes the news available in one place and the user doesn't have to search the news.
- The app is developed using android and hence it will be Userfriendly.

Disadvantages :

- It doesn't display a whole detailed news
- This application's interface is little bad , we can improve it impressively

6. APPLICATIONS

This application is used in Publishing online newspapers, news articles or the news sites so that news is available easily without any searches.

7. CONCLUSION

This is an application which we can use to get a daily news update, first the user has to create an account and then the user needs to login. Users can click the headlines and see the short note of the news . This project is used to get the latest news of the world. The news information ranges from trending sports, health technology, education, science and entertainment. You don't need to go outside and buy a newspaper to see the trending news.

8. FUTURE SCOPE

We have an idea to improve this application , like displaying complete information about the news like where , when , how , who etc. . Also having an idea of increasing the user experience and user interface so the user can get colorful visuals.
